**The Army Managers' Internal Control Program (MICP) – Internal Controls in Army Regulations Course
As of 12 February 2014**

1. BACKGROUND: Internal controls are the rules, procedures and mechanisms we use every day to ensure what should happen in our daily operations does happen. Internal controls promote the wise use of resources; deter fraud, waste, and abuse; and protect our resources -- our dollars, our equipment and, most importantly, our people. Rooted in our professional military ethic, the Army is a trusted institution with leaders committed to doing what is right in all aspects of our operations.

The Army Managers' Internal Control Program is designed to ensure programs operate as intended, areas needing improvement are identified and reported, and timely corrective action is taken. The program promotes these goals through periodic evaluation of key controls, and full disclosure of the shortcomings we detect. Since inception in 1982, the Army Internal Control Program has identified and reported 237 Army-wide material weaknesses of which 233 were corrected through Fiscal Year 2012.

Responsibility for good internal control rests with all Army personnel – managers must establish a positive control environment. Your continued diligence, oversight and leadership are crucial in this regard. We ask you to stress the importance of effective internal controls to your mission, to ensure your staffs understand their responsibilities in this program, and to demand integrity in the prompt reporting of internal control
